

STARCOM Skylink Services

Just Click and Grow. The Total Software Solution is Now Affordable for Small Growers.

Put the power of Plant Partner to work for your greenhouse for a low monthly access fee. With Skylink Services, you are just a click away from the software tools favored by Top 100 Growers.

Using powerful remote satellite connectivity, your system will be running on the highest speed networks with maximum security, managed by professionally certified network experts.

Benefits include:

- Access to powerful software tools for production scheduling, resource planning, order processing, shipping management, sales analysis and accounting.
- Low implementation costs.
- Sixty day trial period.
- No more networking and operating system nightmares. No technical expertise required.
- No more reoccurring hardware upgrade costs.
- Free software upgrades.
- Hands on technical support.

How Skylink Services Works:

Skylink Services is specifically designed for 1-3 terminal environments. For the monthly access fee, you will receive terminals and keyboards (monitors not included), 1 Dot Matrix printer and 1 Laser Quality Printer.

These terminals will connect to powerful servers through remote communication software. To make the connection, you will need a dedicated modem line and a satellite data transfer system. These satellite systems provide high speed line access to the remotest greenhouse locations for a small installation and monthly line fee.

These sophisticated network systems are the most reliable, secure networks on the market today. Your data will rest secure behind extensive fire wall and password protection. Constant data replication and regular tape backups ensures your data. You will be able to print all documents to your local printers.

You will have access to Plant Partner Sales and Production modules as well as the integrated AccountMate Financial System. Additional modules for space planning and web site creation can be added as necessary.

For an initial two month fee, you will have a 60 day trial period. After training and the trial period, you will be ready to participate in a three year contract.

Skylink Services Access Fees:

- \$389/month - 1 terminal
- \$439/month - 2 terminals
- \$489/month - 3 terminals

Training and annual support fees are billed separately.
